Smile with confidence

There's an Esthetic RevolutionSM going on in dentistry!

Have you thought about improving your smile? Have you considered a smile makeover? Have you dreamed about the difference a beautiful smile would make in your life? Now your dentist can help make your dream come true. No more dark fillings, dull lifeless crowns, or black shadows at the gum line. It is possible to repair broken or decayed teeth and actually "restore" them to their natural beauty and strength. In addition, new restorative materials, like IPS Empress[®], can change your smile by replacing stained, chipped, missing, or worn teeth with metal-free inlays, crowns, veneers and bridges.

*Look how IPS Empress has changed smiles and lives.
Ask your dentist what procedure is right for you.*

Eliminate Black Metal Lines Around Restorations

Replace Traumatized Teeth

Repair Teeth that are Worn

Replace Old Dull Metal-Based Restorations
